Valeriya Kettelhut PhD,

Founder of
Valeriya Life, Advanced
Aesthetics Center
Omaha, NE

"After my surgical and clinical research career, I decided to share my experience and expertise in another way – helping others achieve better wellness and health through improving their appearance. Healthy weight and glowing, toned skin are two major visible attributes of health, we focus our efforts on".

Introduction

Valeriya Life is proud to provide LPG Endermologie® for elimination of edema and deep fibrosis reduction as a post-operative aesthetic care of your choice in Omaha, NE. This treatment is highly recommended by plastic surgeons across the world as a necessary post-operative treatment. This treatment is the best way to speed the clients healing process, prevent fibrosis, reduce scarring, reduce seroma and swelling after your clients' surgery with our exclusive medical grade treatments.

Brett Kettelhut, MD

Director of
Valeriya Life, Advanced
Aesthetics Center
Omaha, NE

"Our goal is to embrace lifelong healthy habits, achieve optimal body composition, rejuvenate skin, and to ultimately help you in your efforts to not only look well, but feel well."

Overview

Our procedures were comprehensively studied at the prestigious clinics in Europe and U.S. It has been proven time and time again to be the most effective treatments in the market today. Our team includes therapists with nursing, massage therapy, and aesthetics backgrounds. We also have experience in post-operative care.

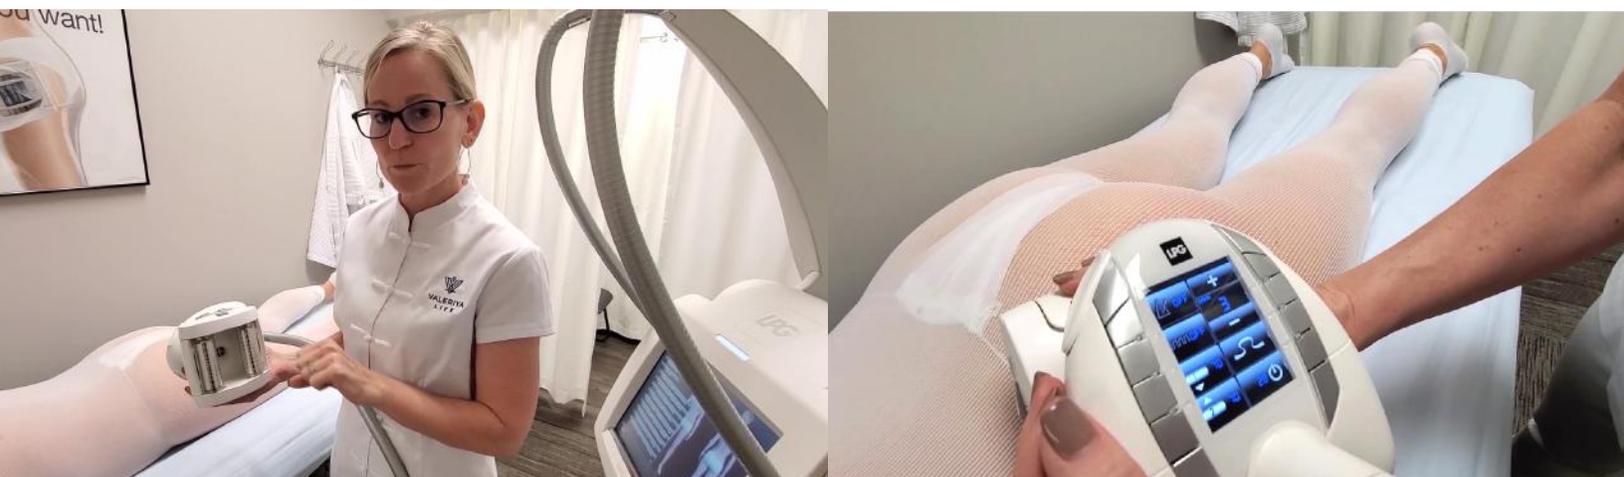

How It Works

LPG ENDERMOLOGIE®

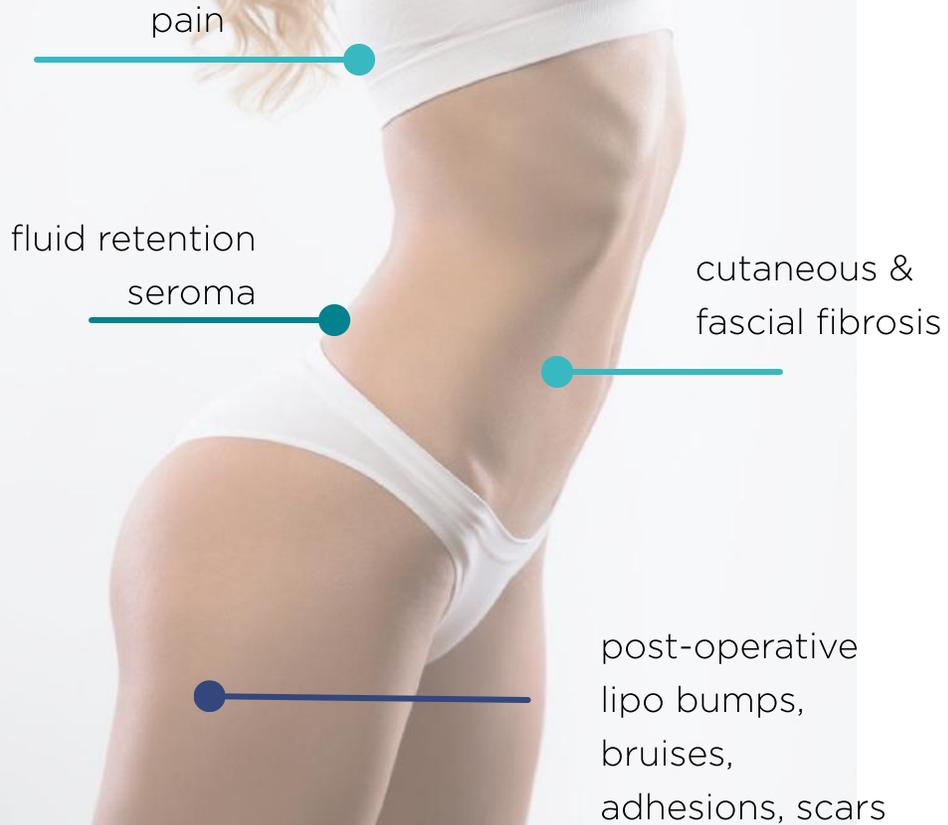

Our exclusive treatment protocols include non-invasive methods for working with soft tissues. Post-op aesthetic care for fluids and tissue mobilization is a specialized treatment that aids in the reduction of water retention as well as the healing process by promoting a better local blood circulation and stretching the connective tissue. A computer-driven handle and head produce intermittent suction and simultaneous rolling of the subjacent soft tissue.

Valeriya Life™ is the only center that provides LPG® Alliance, the newest endermologie® technology.

Jennifer Davidson, RN, Center Therapist

Indications

Our treatments can be performed not only in post-operative period but pre-operatively as well

Pre-Operative Indications

- Chronic inflammation associated with excess fat
- BMI level not suitable for surgery
- Rigid superficial fascia and dense extra-abdominal fat
- Soft tissue tightness (membranous adipose tissue)
- Post-injections tissue hardening

PATIENT BENEFITS

scars

lipo bumps

seroma

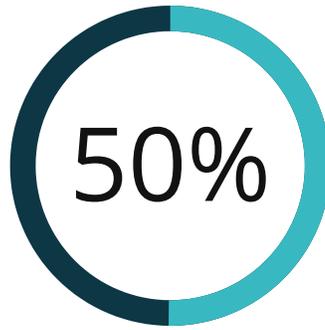

indentations

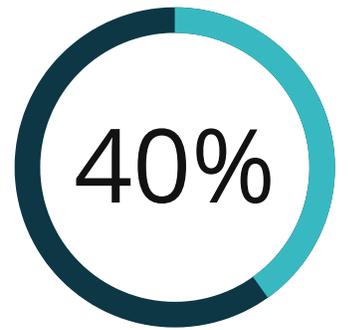

bruises

low grade
inflammation

downtime and pain
reduction

reduction of
fibrosis

BEFORE & AFTER LPG ENDERMOLOGIE 1 SESSION

"After each endermologie treatment I feel a lot better. I can tell I am getting better results with my liposuction and recovery time." J.

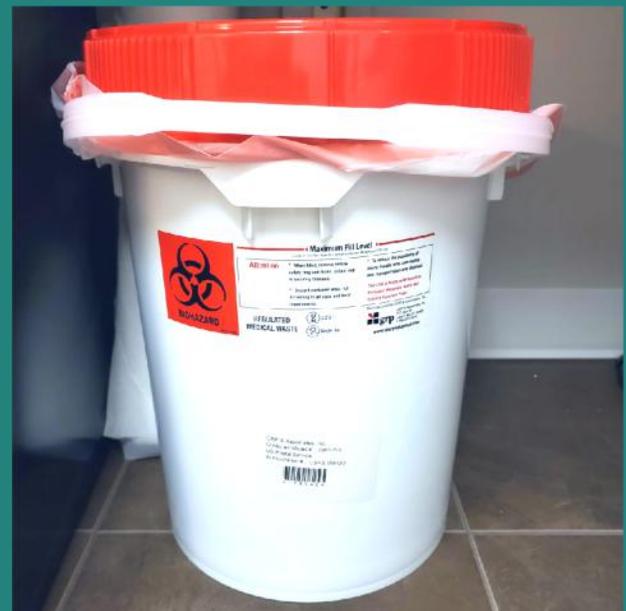

Safety

Unfortunately, sometimes patients seek help in medical spas that do not have needed expertise and technology.

Also, the post-op endermologie-based fluid mobilization and connective tissue massage technician must be familiar with the surgery procedure as well as infection transmission prevention measures.

The proper Endermologie treatment is not a standard massage therapy and must be treated with caution because of wounds.

Benefits for Plastic Surgeon & Family Physicians

The key benefits of utilizing our services is to prevent post-surgical revisions and negative customer reviews of your practice. We're your safety net. We offer care packages for Plastic Surgeons and other Physicians who are interested in reserving our services for their clients. Also, we are offering a partner program to keep post-operative treatments or post-injection treatments affordable for your clients. With Valeriya Life, your surgery and care are perfected!

Treatments & Cost

TREATMENT

LPG Endermologie: twice a week 4-6 weeks after 2nd post-op week.

COST

We offer fair competitive pricing along with a professional and pleasant atmosphere. The affordable cost of our post-op treatments saves the client time and money, as well as revision trips back to the plastic surgeon.

Our Center

Valeriya Life is Advanced Aesthetics Center that provides integrative, science-based treatments to delay and reverse the signs of skin and body aging to men and women who desire to look younger & healthier. We are dedicated to giving people the possibility of enjoying an optimal quality of life and aging successfully while maximizing their performance.
